

St Oswald's Year 2: Weekly Update

15th - 19th November 2021

We have had another busy week in Year 2 as we work our way through our 'Touch The Future' curriculum that we follow in St Oswald's. We have been learning and honing our skills across the subjects. Here is a snippet of what we have been working on this week:

Science - What is waterproof?

This week in science we have been learning about the inventor Charles Macintosh. We tested some materials to see which were waterproof and which weren't. Obviously the best way to do that was to sit underneath the material and hope for the best!

D.T:

The children have continued looking at structures in DT, this week they were working out how to make a strong cylinder.

Geography:

The children were learning about the differences between towns and cities. Here they were using physical venn diagrams to sort between the different features.

Anti-bullying week:

This week is national anti-bullying week. To raise awareness the children have been coming into school in odd socks to remind themselves that everyone is different and unique, but we can still treat everyone with kindness no matter who they are everyone with kindness no matter who they are!

Stars of the week:

A **HUGE** congratulations to our star of the week this week, Bethany! You are a superstar!

I hope you have all enjoyed reading and questioning the children on their new books and once again I thank you for all you have been doing with your children at home.

It has been great working with the children this week and I look forward to more fun learning next week.

All the best,

Mr Coppenhall
