

Y6 Class News 8<sup>th</sup> – 12<sup>th</sup> November 2021

Hello again, this week has been another fantastic week in Year 6. We have, once more, received comments and messages about the lovely children that are in our class from visitors to the school and parents alike. I've witnessed some great demonstrations of friendship and kindness as they look out for and look after each other.

This week, the children have embraced a new starter to our Maths lessons by completing some Fluent in Five questions which aims to improve the children's arithmetic skills by answering 5 SATs style arithmetic questions in just 5 (and sometimes I've only allowed them 4 ½) minutes. In History, a particular favourite subject of mine, we have been finding out about how brutal the Romans were when issuing punishments to people who committed crimes and we even got a chance to create our own curse tablets, out of clay, which were used by the Romans to ask the gods to punish those who had committed a crime that had not been detected. In Design and Technology, we have been investigating the best way to create patterns for our waistcoats.

As you can see we have been very busy, as always, because this is just a snippet of the things that we have covered this week. I also wanted to mention that our PE lessons on Wednesdays are always outside and sometimes can be outside on Fridays so it is vital that the children have blue sweatshirts on these days.

Have a wonderful weekend,

Mrs Crook
