

Year 3 Class Blog

Year 3 have made a fantastic start to KS2 and are settling routines and expectations really well. They have shown a positive attitude towards their learning and are becoming increasingly confident and independent.

In Maths, the children have been enjoying developing their understanding of place value. They have been learning how numbers are represented using thousands, hundreds, tens and ones, and have been applying these skills to a range of activities and challenges.

In PE, the children have been learning and applying the rules and skills of handball. They have enjoyed developing their passing, movement and teamwork skills while working together during games.

In Science, we have been learning about the human skeleton. The children have been identifying different bones in the body and have enjoyed measuring and comparing the

sizes of bones. They have shown lots of curiosity and enthusiasm when exploring how our skeleton supports and protects our bodies.

It has been a wonderful start to Year 3, and we are very proud of how well the children are settling into KS2 and embracing their learning.

Kind regards.

Mr Critchley
