Year 3 Class Blog 12.11.26

Since returning after half term, Year 3 have settled back into school routines brilliantly and have been working extremely hard in all areas of the curriculum. The children have shown a positive attitude to their learning and have been keen to challenge themselves.

In PE, the class have thoroughly enjoyed starting their new gymnastics topic. They have been learning and practising a variety of balances and rolls, developing their strength, control and coordination. The children have worked hard to improve their movements and are becoming more confident performing sequences safely and creatively.

In Design and Technology, we completed our food packaging project by carefully cutting out nets of 3D shapes and constructing them into packaging. The children then added their own creative designs, considering how packaging can be attractive and suitable for its purpose. They were very proud of their finished products.

In Science, we investigated the effects of forces on moving objects. The children explored how different surfaces can slow down a toy car and learned that friction acts as a force that affects an object's movement. They enjoyed carrying out practical investigations and using their observations to explain their results.

It has been a fantastic start to the half term, and we are very proud of the enthusiasm, effort and progress that Year 3 have shown across their learning.

Kind regards, Mr Critchley
