Year 5 Class News- Week beginning 9th November 2026

Dear Parents,

This week we have been practising our gymnastics. We learned how to hold balances then jump into these balances elegantly using pointed hands and feet. We then used these moves to create a sequence with our partners. Zimi and Sienna and Daisy and Ava were particularly synchronised and displayed fantastic grace and balance.

Here are a few photos of our gymnastic experience.

In Maths, the children have displayed great resilience while finding and understanding equivalent fractions. This has not been easy, but the children haven't given up and are now starting to show a good understanding.

We enjoyed our first swimming lesson back after half term and the children have picked up where they left off. Great efforts all round.

Finally, we have been learning all about the Alps in Geography and the children have asked so many questions, showing a real hunger and desire to learn more.

Thank you for a wonderful week, Year 5!

Kind Regards

Mrs Neiland and Mr Mckenzie
